

NATURE'S FINEST, RIGHT TO YOUR TABLE...

PREMIUM QUALITY

MADE IN GERMANY

We are pleased to announce that our honey production in Germany is IFS certified.

About Us

Since opening our production facility in Berlin in 2005, Buram GmbH has been delivering high-quality honey under the Buram brand to customers in the USA, Canada, Saudi Arabia, China, and across Europe. Germany's strategic location in the heart of Europe, combined with its reputation for maintaining the highest quality standards, has been instrumental in our success. Over the years, we have continuously expanded our product range. In addition to pine and blossom honey, our offerings now include organic blossom honey, acacia honey, chestnut honey, linden honey, thyme honey, comb honey, bee pollen, and royal jelly. These products are readily available in supermarkets. Beyond our core business of selling honey in various packaging sizes, Buram GmbH has grown significantly as a wholesaler in the honey market. We source our honey from beekeepers worldwide and supply major honey bottlers throughout Europe. What started as a small family business has evolved into a large international company, all while staying true to our core philosophy: "Our products are of the highest quality."

Our Quality Policy

Our primary objective is to offer our customers service and quality at attractive prices. We are committed to continuous improvement and innovation to meet and exceed customer expectations. By maintaining rigorous quality control standards and fostering strong relationships with our suppliers, we ensure that our products consistently meet the highest standards of excellence. Additionally, we are proud to be IFS certified, which underscores our commitment to quality and safety in all our processes.

Our Market is the World

From Berlin to the entire globe: Buram GmbH delivers internationally to over 40 countries across 5 continents. Our customers benefit from our strategic and logistical location in the heart of Europe. We pride ourselves on our ability to efficiently manage global distribution, ensuring that our high-quality products reach customers wherever they are. Our commitment to excellence and customer satisfaction drives us to continuously improve and expand our international presence.

Export

We provide comprehensive export services, including export declarations and certificates of origin (manufactured in Germany). Our commitment to quality ensures that all our services meet the highest standards. Additionally, we offer tailored support to navigate international trade regulations, ensuring a smooth and efficient export process for our clients. Our experienced team is dedicated to providing exceptional service and ensuring that our products reach global markets seamlessly.

Honey is a natural sweet food substance produced by bees from the nectar of flowers or secretions of plants. Naturally sweet and nourishing, honey has been consumed by humans for centuries. It is also known for its antibacterial and antioxidant properties. Honeys obtained from various flowers can vary in taste, ranging from dark golden to light golden color. Often used at breakfast, honey is also commonly preferred in dessert making. Besides being beneficial for health, this natural remedy source with its delicious taste is irreplaceable on our tables.

Blossom Honey

A general term for honey made from the nectar of various flowers. It has a light, sweet flavor and is commonly used as a natural sweetener.

Acacia Honey

Derived from the nectar of black locust tree blossoms, this honey is light in color with a mild, floral taste. It remains liquid for a long time due to its high fructose content.

Black Forest Honey

Made from the honeydew of trees rather than flower nectar, this honey is dark and has a robust, slightly woody flavor.

Sidr Honey

Produced from the nectar of Sidr tree flowers, this honey is highly prized for its rich, buttery taste and numerous health benefits.

Chestnut Honey

Known for its strong, slightly bitter flavor, chestnut honey is dark and rich in minerals. It has a distinctive, earthy taste.

Forest Honey

Similar to Black Forest honey, this type is made from tree honeydew. It has a dark color and a strong, aromatic flavor.

Honey Comb

This is honey in its most natural form, still contained within the beeswax comb. It has a chewy texture and a rich, sweet flavor.

Manuka Honey

Sourced from the nectar of the Manuka tree in New Zealand, this honey is renowned for its potent antibacterial properties and unique, slightly medicinal taste.

White Honey

This honey is light in color and has a smooth, creamy texture. It is often milder in flavor compared to darker honeys.

Honey with Royal Jelly

A blend of honey and royal jelly, which is a nutrient-rich substance produced by bees. This combination is believed to offer enhanced health benefits.

Honey with Ginger

Infused with ginger, this honey has a warm, spicy flavor and is often used for its soothing properties, especially in teas.

Buckwheat Honey

Dark and robust, buckwheat honey has a strong, molasses-like flavor. It is rich in antioxidants.

Honey with Black Seed

This honey is mixed with black seed (Nigella sativa), known for its health benefits, including boosting the immune system.

Bee Pollen

Not a type of honey, but a mixture of flower pollen, nectar, enzymes, honey, wax, and bee secretions. It is often consumed for its nutritional benefits.

Organic Flower Honey

Produced from the nectar of organically grown flowers, this honey is free from pesticides and chemicals, offering a pure and natural taste.

Organic Acacia Honey

Similar to regular acacia honey but sourced from organically grown black locust trees, ensuring no chemical residues.

Organic Forest Honey

Made from the honeydew of trees in organic forests, this honey is dark and rich in flavor, free from synthetic chemicals.
